PROFESSIONAL SUMMARY

Results-driven SEO intern and MCA student with 12 weeks (64 working days) of hands-on experience at Jenex Technovation Pvt. Ltd., Ahmedabad (17 June – 16 September 2026). Worked across two domains simultaneously: live client SEO — performing 30+ Advanced SEO Audits, managing 50+ client websites, building citations, writing SEO-optimised blogs and guest posts, and managing Google Search Console for US-based contractor websites — and AI-powered mobile application development as a core contributor to FieldLoop AI, a real-world field service app built in Flutter (Dart) with AWS Lambda, Supabase, Deepgram, Groq, and Google Gemini Live function calling. Delivered verified performance milestones: sub-8-second Knowledge Base voice responses, real context-window compression events, successful voice-driven photo workflow, and first formal Gemini Live end-to-end application demo. Currently pursuing MCA at Silver Oak University (CGPA 8.59).

KEY ACHIEVEMENTS

- 30+ Advanced SEO Audits completed for live US-based contractor websites — On-Page, Technical, Local SEO, GA4, PageSpeed, Schema, GEO/AEO readiness, and competitor analysis.
 - 50+ client websites managed for SEO activities including audits, citations, indexing, backups, and lead reporting across 64 working days.
 - Hundreds of citation submissions and verifications across 50+ trusted business directories for 15+ contractor websites.
 - First llms.txt implementation on a live client website (Pasadena Roofing Pro) — a cutting-edge, rarely implemented modern SEO technique for AI search visibility.
 - First Schema Markup implementation on a live client website (Pasadena Roofing Pro) — Home, About, and Contact pages validated via Rich Results Test.
 - FieldLoop AI — contributed to building a complete field service mobile application from scratch: authentication, geofencing, offline photo queuing, voice assistant, estimate/change order/invoice workflows, and Gemini Live agent interface.
 - Gemini Live Integration — 8 connected application functions, natural-language screen navigation, interruption testing (253ms server response), verified context compression events (6,075→5,042 and 12,312→5,098 tokens), Knowledge Base boundary testing, and first successful voice-driven photo workflow end-to-end.
 - 4+ production websites restored from backups (MySQL setup, WordPress config) and 4 websites migrated between GreenGeeks hosting accounts.
 - Multiple client demonstrations delivered to Bob (FieldLoop AI client) via Zoom — presenting complete application workflow, collecting feedback, and converting requirements into development tasks.
-

CORE SKILLS

SEO — On-Page: Metadata optimisation (title tags, meta descriptions, heading structure), content optimisation for search intent, image SEO (ALT text, titles, captions), internal linking, URL structure analysis, Core Web Vitals

SEO — Technical: Advanced website auditing, crawlability & indexing assessment, XML sitemap submission, robots.txt, llms.txt (AI crawler management), broken link identification & resolution, redirect chain analysis, page speed optimisation, Schema Markup / Structured Data

SEO — Local: Google Business Profile (GBP) management, citation creation & submission across 50+ directories, NAP consistency management, GBP suspension identification

SEO — Off-Page: Guest posting (Medium & directories), SEO-optimised blog writing, backlink tracking & verification, anchor text documentation, social media content creation

SEO — AI-Driven: AEO (Answer Engine Optimization), GEO (Generative Engine Optimization), FAQ/Q&A content structuring, competitor analysis with E-E-A-T improvement planning, AI search readiness assessment

SEO Tools: Google Search Console, Bing Webmaster Tools, Google Analytics 4, Google PageSpeed Insights, Rich Results Test, Google Business Profile dashboard, CallRail

Content & Writing: SEO blog writing, guest posting, article writing, content structuring, on-page content optimisation, social media copywriting, daily/weekly lead reporting, Technician App User Manual, project progress reports

Digital Marketing: Social media publishing (Instagram, Facebook, Pinterest, YouTube Shorts), content marketing, citation building, NAP consistency, backlink management, off-page SEO outreach

WordPress & Hosting: WordPress management, Rank Math Pro, WP Rocket, Elementor, website backup & restoration, MySQL DB configuration, website migration, security hardening, GreenGeeks cPanel, DNS configuration

AI & App Development: Flutter (Dart), FlutterFlow, Android Studio, AWS Lambda, Amazon API Gateway, Amazon S3, CloudFront CDN, Supabase (PostgreSQL + RLS + real-time sync), Deepgram API, Groq API, Google Gemini Live (function calling, context compression, wake-word integration), Next.js, Vercel, Twilio

API & Testing: Postman (API testing & authentication validation), DevTools timeline profiling, APK build & real-device testing, offline-first architecture (local storage queuing & auto-sync), geofencing implementation

Tech Stack: React.js, Node.js, Express.js, HTML5, CSS3, JavaScript, Git, GitHub

Soft Skills: Client communication, team coordination, project progress reporting, requirement analysis, technical research, documentation, evidence-based debugging, problem solving

INTERNSHIP EXPERIENCE

SEO & AI Development Intern — Jenex Technovation Pvt. Ltd., Ahmedabad 17 Jun 2026 – 16 Sep 2026 (12 Weeks · 64 Days)

Jenex Technovation — Ahmedabad-based product engineering company: Embedded Systems, IoT, Cloud, AI/ML, Mobile App Development, Hardware & Firmware. Clients across USA, Europe & Southeast Asia. Supervised by Hariom Bhai (SEO) and Project Lead (FieldLoop AI).

SEO — Auditing & Technical SEO

- Performed 30+ Advanced SEO Audits for live US-based contractor websites covering On-Page SEO, Technical SEO, metadata, website structure, internal linking, Core Web Vitals, crawlability, indexing, local SEO, GA4 traffic analysis, PageSpeed Insights, Rich Results / Schema validation, GEO readiness assessment, and competitor analysis.
- Managed Google Search Console and Bing Webmaster Tools for 50+ websites — submitted XML sitemaps, verified properties via DNS on GreenGeeks, requested page indexing, and monitored impressions, clicks, CTR, and average position.
- Conducted comprehensive broken link audits across 15+ websites — identified invalid URLs, redirect chains, and non-functional links to improve crawl efficiency and user experience.
- Implemented Schema Markup (structured data) on Home, About, and Contact pages of Pasadena Roofing Pro — validated via Rich Results Test for rich snippet eligibility.
- Implemented llms.txt and optimised robots.txt on Pasadena Roofing Pro — improving AI content discoverability and crawler management for AEO and GEO readiness.
- Conducted competitor analysis for Jenex Technovation website — identified content gaps, E-E-A-T improvement opportunities, AEO/GEO content ideas, FAQ topics, internal linking improvements, and recommended a dedicated Case Studies / Leadership page.

SEO — Local SEO & Citation Building

- Built and submitted citations across 50+ trusted business directories for 15+ contractor websites, maintaining consistent NAP (Name, Address, Phone Number) information to strengthen local search visibility.
- Managed and verified citation profiles, updated 'Find Us' website sections with live directory links, and filtered high-authority citation platforms for targeted local SEO campaigns.
- Monitored Google Business Profile (GBP) status for multiple client websites — identified and documented a suspended profile for resolution.

Content Writing & SEO Copywriting

- Wrote and published SEO-optimised blog posts for client websites (La Jolla Concrete Pro, Pasadena Roofing Pro) targeting high-intent keywords and improving organic content coverage.
- Optimised homepage and service page content following modern SEO, AEO, and GEO best practices — added Q&A sections, lead-generation CTAs, and answer-engine-ready formatting for Pasadena Roofing Pro Phase 1.
- Created and published 20+ guest posts on Medium and other platforms for 10+ client websites to build off-page authority, brand visibility, and quality backlinks.
- Managed blog comments across 10+ websites — responding, maintaining date-wise documentation, and tracking for off-page SEO consistency.
- Prepared daily and weekly CallRail lead reports — collecting and analysing total calls, answered/missed calls, lead quality, call recordings, conversion opportunities, and contact form leads for 50+ websites across multiple client groups; shared with managers and clients via email.

Digital Marketing & Social Media

- Created, optimised, and published social media content for Ina's Kitchen & Tours and ABL Construction (8 websites) across Instagram, Facebook, Pinterest, and YouTube Shorts — applying platform-specific best practices, SEO-friendly captions, and consistent branding.
- Designed and optimised promotional images for social media campaigns; compiled 12-month CallRail datasets for 50+ websites across AT Foam, ABL Construction, and S&A Pacific Construction.

WordPress & Website Management

- Managed 15+ WordPress websites — updated plugins (Rank Math Pro, WP Rocket, WP Backup), created full website and database backups, restored 4+ production websites from backup files on GreenGeeks (MySQL setup, WordPress config file update, connectivity verification).
- Successfully migrated 4 websites to new GreenGeeks hosting accounts — importing SQL databases, configuring MySQL credentials, and verifying deployment.
- Resolved multiple WordPress website outages by locating missing theme files from backups, repackaging, uploading, and restoring theme assets.
- Implemented WordPress security hardening — removed default admin usernames, created stronger credentials across multiple client sites.
- Created, compressed, and uploaded optimised images with ALT text, titles, and descriptions across 10+ websites; designed logos and favicons for client websites implemented site-wide via Elementor.

FieldLoop AI — AI-Powered Field Service App (Core Project)

Flutter (Dart) · FlutterFlow · AWS Lambda · API Gateway · Amazon S3 · CloudFront · Supabase · Deepgram · Groq API · Google Gemini Live · Next.js · Vercel · Twilio

- Contributed as a core developer on FieldLoop AI — a real-world field service application for contractors and technicians, built from initial documentation review through to production-ready features across 12 weeks.
- Built core technician workflows end-to-end: Geofencing (automatic arrival/departure tracking with job timeline events), offline-first photo upload with S3 queue and auto-sync on connectivity restoration, Estimate Generation (voice + manual + confirmation workflow), Change Order creation with customer SMS approval link, Invoice Generation, and Job History with GPS-timestamped activity timeline.
- Implemented Voice Assistant using Deepgram (speech-to-text), on-device TTS, and hybrid Knowledge Base + LLM fallback — achieving sub-8-second response times verified across both Bluetooth headset (BlueParrott M300-XT SE) and device audio modes.
- Integrated Google Gemini Live API with 8 connected application functions for natural-language function calling — enabling technicians to navigate screens, create estimates, manage change orders, generate invoices, and trigger camera workflows entirely through conversational voice commands.
- Conducted evidence-based AI system validation: interruption testing (server responded in ~253ms), real context-window compression events (6,075→5,042 and 12,312→5,098 tokens), Knowledge Base boundary testing (confirmed out-of-scope question refusal — plumbing, geography, general knowledge), and DevTools timeline profiling to identify unused camera stream bottleneck.
- Successfully completed first full voice-driven photo workflow end-to-end in real-world testing (Open Camera → Capture Photo → Retake Photo via natural voice command) — a major production milestone on Day 64.
- Built and deployed FieldLoop AI Landing Page using Next.js to Vercel; configured domain connection via GreenGeeks.
- Guided team member (Prem) throughout Contractor Dashboard implementation — covering dashboard architecture, authentication, database design, FlutterFlow/Flutter development, and backend integration.
- Participated in multiple Zoom demos with Bob (client) — presented complete end-to-end Technician App workflow, collected feedback, and converted requirements into actionable development tasks.

PREVIOUS EXPERIENCE

Cloud Support Engineer Intern — Bit & Binary, Ahmedabad

Jan 2024 – Apr 2024

- Configured AWS EC2 instances, applied IAM security policies, hosted static web apps on S3 with optimised delivery, and enforced security group policies.
- Monitored AWS cost metrics via Cost Explorer and recommended cost-reduction strategies contributing to measurable savings.
- Applied AWS Well-Architected Framework principles across security, performance, and reliability pillars.

PERSONAL PROJECTS

Cyber Kavach — AI Phishing & Scam Detection Platform

2024

React.js · Node.js · Express.js · Supabase · LLM APIs · AWS

- Built a full-stack real-time phishing detection platform using AI/LLM APIs — React.js frontend, Node.js backend, cloud-hosted database. Wrote all user-facing copy in clear, plain language. Deployed to production on AWS.

Gathered — AI-Powered News Aggregator

2024

React.js · Node.js · Express.js · RSS Feeds · LLM APIs · AWS

- Built a content aggregation platform with AI-driven summarisation across multiple global RSS feeds — category-based React.js UI, Node.js pipeline with deduplication and concurrent feed parsing. Deployed on AWS.

LIVE CLIENT WEBSITES WORKED ON (INTERNSHIP)

- Contractor SEO (US-based): Arcadia Home Remodeling, San Diego Concrete Company, Alhambra Pavers / Nexus, East Los Angeles Roofing, Carlsbad Concrete Pro, Downey Roofing Pro, La Mesa Concrete Pro, El Cajon Concrete Contractors, Mission Bay Concrete Pro, Mission Valley Concrete, Chula Vista Concrete Company, Del Mar Concrete, La Jolla Concrete Pro, Renton Insulation Pro, San Rafael Concrete Pro, Pasadena Roofing Pro, Kent Insulation Services, Lakewood Remodeling Contractors, Santa Clarita Roofing Pro
- Website Restorations: Sarasota Pool Screen, Sarasota General Contractors Pro, Conway Remodeling Pro
- Website Migrations (GreenGeeks): Richmond Landscape Pavers, Berkeley Landscape Design, El Cerrito Landscape Design, Richmond Landscaping Pro
- Client Websites: Inas Kitchen and Tours (social media & WordPress), Valyrian Tech & Custom (certification section update), Jenex Technovation (SEO audit & competitor analysis)

EDUCATION

Master of Computer Application (MCA) — Silver Oak University, Ahmedabad

2024 – 2026

CGPA: 8.59

Bachelor of Computer Application (BCA) — Silver Oak University, Ahmedabad

2021 – 2024

CGPA: 8.41

CERTIFICATIONS

- AWS Knowledge: Architecting — Amazon Web Services
- AWS Knowledge: Cloud Essentials — Amazon Web Services
- AWS Knowledge: Networking Core — Amazon Web Services
